CD-7060 3-Axis CNC Prepreg Slitter

FROM CONCEPT TO COMPLETION

Highlights

- Used for cutting long prepreg shapes and re-rolling them on a take-up spool. The "scrap" material is re-rolled on a separate spool.
- 3-Axis CNC Controller with graphic presentation of programs. Axis #1 controls length. Axis #2 and #3 control width and shape of cuts.
- Simple part-programming by unskilled operator.
- Separate cut-to-length prepreg shear is actuated by the controller.
- Separate mechanical slitter assembly folds out to permit conventional slitting of 2 to 8 slits. Each of 8 slitters is easily adjusted to required widths.
- Controller stores 199 pre-programmed parts.
- Variable feed rates to accommodate a wide range of materials.
- Custom take-up spools furnished as required.
- Machine is fitted with heavy-duty casters for portability.
- Minimum floor space requirements.
