Highlights

The CD-8310B Screen Printer is based on a sophisticated PLC-Controlled, Pneumatically-Powered System for printing high quality images on flat substrates. It has been adapted by CDI to print precision images on small diameter tubes such as golf shafts and fishing rod blanks. Includes:

- ◆ Independent precision adjustment of each printing dimension, position, alignment and function.
- ◆ Continuous automatic or operator-controlled single-cycle printing.
- ◆ Three different printing cycles to suit the flow characteristics of a wide variety of screens and inks.
- ◆ Gear-driven indexing for precision multicolor printing.
- ◆ A fully adjustable blank holder system that maintains precise alignment of the blank during the printing cycle.
