

CENTURY DESIGN INC.

CE COMPLIANT

CD-8900 Paint Abrasion Tester

FROM CONCEPT TO COMPLETION

Highlights

- Used to test the durability of paint finishes, clear coats and silk screen inks on small diameter round tubes by reciprocating the painted sample under a standard load.
- Programmable counter which allows the operator to preset a desired number of strokes, then start the machine and walk away. The machine will stop at the predetermined stroke count for inspection of the sample.
- Digital display of machine cycles.
- Adjustable stroke speed.
- Constant velocity action to insure true and accurate testing.
- Interchangeable weights (optional).
