

CENTURY DESIGN INC.

M-800 Rolling Table

FROM CONCEPT TO COMPLETION

Highlights

- ◆ Lower Platen is free to rotate and move transversely to ensure no damage to material
- ◆ Upper Platen automatically follows tapers
- ◆ Reduces stress on prepreg during rolling
- ◆ Heated lower platen for optimum prepreg handling as well as maximizing material tackiness
- ◆ Fully adjustable Rolling speed, pressure and stroke length
- ◆ Standard Lengths: (6 ft through 20 ft), or build to suit
- ◆ Production speeds faster than 10 seconds per cycle
- ◆ Ideal for straight taper or non-tapered parts
- ◆ Can be supplied in any voltage
- ◆ Accepts diameters from 0.030" to 4"
- ◆ Built in safety interlocks
